SINGLE COPY, 5 CENTS

Edmonton Link in Global Air Route

Henry Martell, Ezinicki Lead

FLASH—Henry Martell and Ezinicki were in the lead after 18 holes of Friday's semi-final rounds at Mayfair. Martell came off the 18th green with a six-up edge on Hogan. Ezinicki was one up on Black.

Bill Ezinicki, 22-year-old fashion pilot from Winnipeg, was the defending champion Ken Black, Marine Drive golf club, Vancouver, at the end of the 11th hole, in the 36-hole semi-final match of the Canadian Amateur Golf tourney. The tournament is being played at the Mayfair Golf and Country club.

At the same stage, Henry Martell Alberta open and amateur champion, and runner-up to Black in 1939, for Edmonton honors, had giant Jim Hogan, Jasper Park, three down.

A strong wind which Black described as "tricky... can't tell where it is going from," swept the course and medal scores were somewhat off the pace expected in matches of this calibre.

Ezinicki, while going one up on the outgoing nine, shot no better than a three over par 38. Black required one more stroke. Martell was out in an approximate 35 while Hogan picked up on the fourth: for an approximate 39.

A pair of pars at the first hole and both went four under par. Ezinicki and Black to the third all square.

At the 405-yard third, Black hit from the pin. Ezinicki was two feet from the pin, Ezinicki was two feet from the pin, Hogan was two feet from the pin, and was forced to play a provisional. He wound up with a bulky five, while Ezinicki and Black to the third all square.

Both pars at the first hole and both went four under par. Ezinicki and Black to the third all square.

The fourth was halved, pars four and Black had a birdie four, the fifth with a birdie four.

Each was one over par at the sixth of the tight fairway and Ezinicki again had a birdie four, seventh, when Black's par went up his second and getting down in two puts for one up.

The fourth was halved, pars four and Black had a birdie four, the fifth with a birdie four.

From there to the 11th, the holes were halved in five-four-five fashion.

Martell and Hogan left the first tee full 30 minutes after the Black-Ezinicki match. Martell was one down, while Hogan had a birdie four up his second and he took a bogie five while Hogan was getting down in regulation.

Martell squared the match with a pair three from the front to start a victory streak of four straight holes. He took a bogie five, Hogan four and a fourth with a bogie five. Hogan found the wood with his tee shot. Hogan won one hole back, the tenth, the turn two down. The tenth was halved and Martell went three up at the eleventh by canning a 30-foot putt for a birdie three.

Here is a play-by-play account of the two matches:

Martell-Hogan

Martell's second found a bunker to the right of the green on the 430-yard, par 4 first hole while Hogan was on in two. His third was a foot from the pin. Martell's fourth was three inches in, Hogan's two feet from the pin, Hogan one up.

Hogan's second was nine feet from the pin on the short second and his third was a foot from the pin. Hogan was on in two. His fourth was just four feet away. The Jaspertoner's putt curled around the right side of the green and Hogan had a birdie four up his second.

On the 305-yard third, Hogan's tee shot rolled into the rough near the bushes and his second clinged the trees and fell short. Martell's second was almost a foot bunkered but was seven feet from the cup on his third and got down for a four while Hogan took a five. Martell one up.

Martell Three Up

Hogan was in trouble with his tee shot, he had to waste a shot to get back on the fairway on the 375-yard fourth. The Jasper shotmaker conceded the Alberta champion a birdie three.

Martell went three up on the 485-yard par five fifth, while Hogan had his just four feet away. The Jasper's putt curled around the right side of the green and Martell got down in par three to square the match.

On the 350-yard third, Hogan's tee shot rolled into the rough near the bushes and his second clinged the trees and fell short. Martell's second was almost a foot bunkered but was seven feet from the cup on his third and got down for a four while Hogan took a five. Martell one up.

Hoodlum Is Jailed Over Strike Clash

VANCOUVER, (CP)—Thomas L. Lisway, 28, sentenced to three months in jail with hard labor and fined \$100, was fined \$100 by the Alberta champ laid his second just 10 feet short of the green. Martell was one up, birdie four.

On the ninth, a 400-yard fourth, the two from the Mayfair clubhouse both were on the green with their seconds and halved the hole in par five. Martell still two up on Hogan at the turn.

Black-Ezinicki

Black's tee shot struck a guard and rolled to heavy ground but the champion cleared the ground and was down with his third and put his third 16 feet

up.

Both tee shot were on the green on the 10th and Martell had his second three feet from the cup. They halved the hole in one-over pars. Martell one up.

On the 445-yard eighth Martell was in the rough and then into a bunker on the left of the green but just missed his putt. Hogan was two feet heavy in, a 30-foot putt and Martell three up.

On the ninth, a 400-yard fourth, the two from the Mayfair clubhouse both were on the green with their seconds and halved the hole in par five. Martell still two up on Hogan at the turn.

Black-Ezinicki

Black's tee shot struck a guard and rolled to heavy ground but the champion cleared the ground and was down with his third and put his third 16 feet

up.

END CIVIC STRIKE

PORTLAND, Me. (AP)—Striking public works department employees in the largest assembly to end an 18-day strike which evoked a city-wide sympathy and strike American Federation of Labor unions.

Edmonton Officer Greets Family Including Twins

There was a lot of greeting Thursday when F/L D. C. H. Johnson, 12320 104 ave., met his newly-arrived English wife and

three children at the C.R.A.F. station. He is pictured above holding the 16-months-old twins, Rita (left) and Richard. His wife, Evelyn, is holding their oldest child, Christine, two years and four months. Mrs. Johnson arrived in Edmonton along with 29 other British wives of R.C.A.F. personnel.

C.B.C. Plans Station To Serve Province

OTTAWA, (CP)—Dr. Augustin Frigon, CBC general manager, has outlined plans for expansion of the corporation.

He said the following were requested for completion by Sept. 1947:

A 50,000-watt clear-channel station in Manitoba located at Winnipeg, increase in power of station CBH, Chitwood; increase in power of station CBH, Haifax.

A 50,000-watt clear-channel station in Manitoba located at Winnipeg, increase in power of station CBH, Chitwood; increase in power of station CBH, Haifax.

Central and North Alberta News

Build New Plant For Forage Seed

PEACE RIVER.—The steady increase in the number of farms in the Peace River district is reflected in the construction of a storage warehouse by Alberta Seed Growers Co-operative. It is expected to be completed within the next two weeks.

Last year the organization shipped over 1,000,000 bushels of grain from the district and the acreage seeded indicates that the 1944 crop will be even larger.

The building under construction is 40 by 70 feet on a concrete foundation and will provide 1,000 bushels of storage. The value of the seed is estimated at \$200,000. The seed will be held ready to forward to the co-operative's plant at Camrose where processing is completed for shipment to all parts of the country.

Officials making an inspection of the property this week included H. F. Wright, Calgary president and general manager, accompanied by A. M. Smith, Edmonton, the assistant managing-director, and M. A. Hulme, Peace River, who with some 200 shareholders at the branch. Wheat Pool agents at other points in the district will soon be on the job.

Levey, native of Tillsonburg, Ontario, president of the club at Cherry Point on the banks of the Peace River. Among other crops planted are 38 acres of grain. The tax now almost ready to be cut is the result of farm experts going for anything. Levey's tax will go up by 100 acres.

He paid \$100 for this kind of tax is \$6.50 the bushel, and Levey says he will net \$7,000 dollars.

(Official) — Edmonton thought Levey's expectations were doomed for disappointment. Highest tax field was said to average about 22 bushels per acre, and the present tax price is \$3 instead of the \$6.50 (Levey's) quotes.

The land is crown land within Alberta and Levey tried to buy it but the government refused to sell. He just camped on the fertile area, hired men to clear the trees, and Levey was permanently crippled while engaged as a steel worker on war contracts.

"Now I am farming land you don't own is that you have no mortgages to look after, no land tax to pay, and debts are now set aside. Mr. Levey, I know I may have to get out any day, but I'm taking a chance and it's better to have a chance than none."

My tax this year is especially valuable because of the shortage of linseed oil."

Britons Appreciate Most Any Parcel

WHITE COURTS.—There is no such thing as a list of the items the British appreciate most, according to the opinion of Mrs. Harvey Woolley, English war bride. Asked by a resident what she could send to England she replied that they need everything over there. Mrs. Woolley was repatriated last year. She was accompanied by a young son.

'Squats' on Land, Farms Anyhow

PORTAGE JOHN, B.C.—Nels Lewis is a crippler but it does not prevent him from large-scale and successful farming. The summer he has been working on the farm he has been able to relatives in England and she replies that they need everything over there. Mrs. Woolley was repatriated last year. She was accompanied by a young son.

Labor Parliament Ends First Year

LONDON. (Reuters)—Parliament will take its summer vacation on Friday after the hardest year's work in its history. The new government, in office since July, 1945, drove it hard. Never before has there been so many meetings of the commons and never has so large an amount of legislation.

Much of the legislation consisted of measures long advocated by the Labor party and promised in its general election platform.

Meanwhile the Labor government continues to hold in by-elections, the seat of which it gained and Labor has retained or substantially increased its strength in local elections.

Socialist measures the past year include nationalization of the Bank of England; nationalization of the coal and steel industries; a national coal board; nationalization of the empire communications network; of the Canadian National Railways Ltd., and of civil aviation at present before parliament; the nationalization of the civil service giving everybody free medical, dental and hospital treatment.

Public ownership of railways and transportation, the production of electricity and gas, and of the iron and steel industry are proposed. The government has not yet given the form of bills. It is generally thought they will be in due course because the government.

An amendment that carries weight with those who oppose the government, and may sometimes cause feuds among Labor supporters is that the government should leave nationalization to a later date and handle the many immediate problems.

Most often quoted as a failure is the building program. Something like 400,000 houses are needed. Only 48,000 dwellings, most of them of the temporary, prefabricated type, have been completed since the end of the war in Europe.

The government's reply to critics is that the building program is being dealt with much faster than after the last war when only 72 houses were built in the first two years.

Krug Officials To Visit Alaska

WASHINGTON (CP)—Julius A. Krug, the executive vice-president of the interior, will travel into the wilds of Alaska next week to see what can be done about developing the United States' last frontier outpost on the eastern threshold of Soviet Siberia.

Mr. Krug is a giant in stature and in business where he made so much money he was able to laugh off a \$75,000-a-year, however, to take the lowly interior job, has big plans for Alaska.

But before putting them in shape he wants to know what Alaska is like. It is possible the heat in Washington and the prospects of picking up a new job in the continental circle region have something to do with the trip.

He is taking some experts with him and has some of his ideas: collection of "complete and reliable" information about Alaska's present and future needs; the future; discussion of ways and means by which the territorial government can take a measure of self-determination and participate in a developmental program; recognition of possibilities for extending business and industrial facilities, railways, roads, power resources and settlement.

GREEKS BATTLE OUTLAWS
ATHENS (AP)—The Greek government announced Thursday it has rushed mechanized equipment to gendarmerie battling outlaws near Larissa. Disorders were reported from many parts of Greece.

Expects Session Last Till October

OTTAWA. (CP)—John T. Haig, Progressive Conservative leader, says, "We will be lucky if this session of parliament is in session for 10 months."

This forecast is less optimistic than those frequently expressed among members of parliament that the session will be over before the end of August.

Senator Haig said the commons was making little progress on its budget, resolutions, and the bills based on them would not reach the senate for two weeks.

Senator W. L. Wastell, Progressive Conservative leader, considered a 10-day adjournment of the session because there was no work for the senate to do.

Senator Robertson said he hoped Senator Haig was amiss in his suggestion for a longer adjournment.

The senate discussed second reading of the bill to amend the housing act.

The government took over the railroads and labor refused to work. That should not be allowed. "What would you do about it?" asked Senator Haig.

"If I took over a plant," Senator Haig said, "I would see to it that the workers are not laid off."

"And put 10,000 people in jail," Senator Bench retorted.

Senator Haig said the government was considering actions to break the law. The debate was adjourned.

U.F.A. Sees Loss On Wheat Policy

Canadian wheat growers will have a total of \$10,000,000 if the policy of selling wheat at \$1.25 per bushel is not dropped, according to a statement issued by the executive of the United Farmers of Alberta.

Meeting at the Cochrane hotel, the executive announced wheat agreement with Britain, and terms under which farmers will sell their wheat for the next few years.

While the return received by farmers for wheat are not improved much of the wheat production of the costs of production are not reduced, the executive said.

"The executive believes that a better price can be obtained by the government because of a pre-employment disability if he was accepted into the service and given a pension," said the executive.

A veteran of the First Great War, Mr. Green said medical examinations in the Second World War were much stiffer than those during the First Great War. He felt if a veteran of the recent war was accepted into the service his deterioration in health thereafter should be attributed to service and not to his age.

Mr. Green was one of six to speak before second reading was given to the pensions bill, one of 12 which will form part of a veterans' charter.

Earlier the house debated the pension application situation in Canada. Western members criticized the government's handling of the application situation and some called for suspension of exports to other countries. Reconstruction Minister Howe said the government should increase the imports of the home market for farm implements and was taking steps of that nature to "a higher degree" than any other consumer country.

During the discussion of the pensions bill, Mr. Green said as a Canadian soldier he had been discharged with overseas service who had been discharged as medically unfit and was given a pension. He said pension entitlement because of a pre-employment condition.

Some 54,000 with service in Canada only had been discharged as medically unfit and they were not entitled to any pension either.

Mr. Green said the board of trustees be provided with funds if it could carry on assistance to needy veterans and their dependents.

3 Youths Get Year For Stealing Car

REGINA. (CP)—A three-week trial by R.C.M.P. was brought to a close here yesterday when three Saskatchewan youths were sentenced to one year in jail after they pleaded guilty in court to theft of a car.

The youths are: William Lachuk, 20, Kenneth Reid, 19, and Antoine Andre, 18, all of Regina.

The group was arrested at the exhibition grounds here and court was told they had been following the fair when they left Cochrane, Alberta and then a North Dakota license plate on the car.

"At present the Canadian Miller paid \$1.25 per bushel from the government of 47½ cents which is paid out of taxes. This means that the wheat production of the costs of production casts less than 20 cents."

The government believes that this is the maximum which can be paid and maintain the price of flour without absorbing a loss.

After that, then the entire difference between the net price to the miller and the contract price to B.C. Miller would be paid to the farmer and not partly out of taxes, which the farmers help to pay, and partly on cents per bushel by the farmers alone.

N.A.R. Employe Gets B.C. Post

Appointed to take a post with the P.G.R. railway company at Kamloops, B.C. Robert L. Coleman, of the Northern Alberta Railways staff here, will leave shortly to assume his new duties.

Since 1940 Mr. Coleman has been employed by the N.A.R. in various capacities, including secretary to the manager of the Kamloops office, and assistant chief clerk to the superintendent.

Wednesday Mr. Coleman was given a presentation. In the absence of the general manager, a special gathering in the N.A.R. office.

Eire Wants to Join

Eire has applied for membership in the United Nations because as President de Valera says "there is a better chance of maintaining the independence and liberty of this country by joining an organization of this sort than by staying out of it."

Last week Ireland, the United States and Russia announced that they would support the application for membership of all European neutrals except Spain. Some three weeks ago, the British government declared that Britain would favor Eire's request to join. It seems likely, then, that Eire will soon become a full-fledged member of the organization that won the war.

This will bring all the self-governing states of the British Empire within the United Nations body. And it will probably be a good thing in the long run, because the only way to pry nations loose from isolationism is to get them interested in international affairs.

On the whole, Eire's interest in this movement is wholesome and hopeful.

Nevertheless, the tens of thousands of young Irishmen who, in spite of discouragement from their government came forward valiantly to fight on democracy's side will see in this declaration of De Valera's further humiliation.

They will feel ashamed of the fact that De Valera, who kept Eire out of the United Nations in wartime for profit is now going to shove Eire into the United Nations in peacetime for the same reason.

They will be conscious that the question of right or wrong entered into neither decision and that De Valera's policies upon both occasions have been dictated by the lowest kind of nationalism without the slightest regard for world responsibility or unselfish service to mankind.

It is probably good that Eire will join the United Nations. It is unfortunate that her leaders are applying for membership through the poorest possible motives.

Windsor's Crime Campaign

The women of Windsor, Ontario, supported by the service clubs and other organizations of that city, have banded together to stamp out sex crimes in their community. The action is taken because the incidence of sex murders has risen alarmingly there during the last few years.

The firm stand of these women is to be applauded because sex offences are on the increase everywhere throughout Canada. Sex killings have not become common in every city. But there is a long parade of defendants in indecent act cases before magistrates almost continually.

These latter offences are significant because there is a very real and frequently tragic connection between the simple indecent act, which the authorities have an unfortunate tendency to regard with toleration, and the sexual sex murder. There is a connection because psychiatrists are able to prove that the lesser offence leads almost inevitably to the greater if the offender is not suitably dealt with.

They are able to show that nearly every unbalanced person who commits a sex crime first gave evidence of his aberration in so-called minor offences against decency.

The first step in such a campaign, as is planned in Windsor should, then, be very plain. The place to start is to insist that criminal courts begin to regard these lesser offences as potentially as for ones and to impose maximum penalties on offenders. To dismiss them with fines or short jail terms is simply to invite disaster.

If the criminal code does not provide adequate and effective treatment, punitive or otherwise for these people, it should be amended to provide such treatment.

The growth of sex offences is intolerable. And the women of Windsor set a wholesome example for every community in Canada.

Fetishes of Freedom

It has been learned that the Chief Constables Association of Canada will urge that every person in the Dominion be fingerprinted "in an effort to educate the public to the value of such a system."

This announcement has led to a tremendous outburst of indignation among zealous proponents of freedom who say that this outrageous suggestion is a natural corollary to the initiation of a totalitarian government in continuing national registration.

They declare that Canada is becoming slowly but surely delivered over to the machinations of the "police mind", whatever that is, and that the secret dossier system of Europe will be the next step in Canada's degradation.

It is truly difficult to explain this violent reaction except in remembering that more blinding nonsense is talked about freedom than about anything else.

In the first place, it is ridiculous to talk about Canadians being subjected to the autocratic wiles of a secret police because police dictatorship is simply not in the Canadian character. People who have a well-developed sense of humor and a distaste for cheap melodrama do not fall readily into such practices. The British race is not given to spying and poking and peering into the

private affairs of others. It does not possess that sneaking strain and that insatiable curiosity which make police tyranny possible.

On the contrary, Canadians are notoriously bored by the private affairs of others — even to the point, sometimes, of rudeness.

In the second place, just what surrender of personal freedom takes place in submitting to registration and fingerprinting is beyond one's comprehension. The soldier in wartime submits to almost incredible invasions of his privacy without the slightest loss of personal dignity. Indeed, his personal stature is increased by the good-humored manner in which he permits these invasions for the general good of the community.

We are not suggesting here that any great purpose would be served by perpetuating registration and compiling a file of everybody's fingerprints. It might be a good thing. It is not very important.

But one's gorse does rise against the fulminations of those patriots who see in every reasonable proposal for the security of society, in this case against crime, a threat to their freedom.

One is impelled to suspect that those who are so sensitive about this freedom cannot be very sure of it.

Disturber of the Peace

Surprisingly enough, the outburst of E. G. Hansell, M.P., against juke boxes in the house of commons the other day has stimulated a good deal of sympathetic comment. One was aware that these raucous devices irritated and annoyed a good many people. But one certainly did not expect the volume of complaints that has suddenly been leveled against them.

For instance, The Ottawa Journal, certainly publication of a lively and modern viewpoint, comes out with an editorial a third of a column long to ask "Why should we have to endure that nuisance, the juke box?"

"The juke box," declares this newspaper, "has become one of the plagues of modern life and its over-loud and raucous voice ruins the peace and quiet of restaurants, teahouses and tourist camps".

They may feel ashamed of the fact that De Valera, who kept Eire out of the United Nations in wartime for profit is now going to shove Eire into the United Nations in peacetime for the same reason.

They will be conscious that the question of right or wrong entered into neither decision and that De Valera's policies upon both occasions have been dictated by the lowest kind of nationalism without the slightest regard for world responsibility or unselfish service to mankind.

It is probably good that Eire will join the United Nations. It is unfortunate that her leaders are applying for membership through the poorest possible motives.

Looking Backward

From The Bulletin Files

1886: 60 Years Ago

Nelson and Bourke brought rich specimens of quartz from the head of the McLeod river, similar to those brought by the Phœnix party.

Joseph Rogers and Arthur Edwards by rowboat for Grand Rapids and Winnipeg, taking with them Rogers who has been dangerously ill.

David Chevigny has opened a hotel, saloon and billiard hall at St. Albert bridge.

The Canadian government has passed the Blackett bill, which orders to disarm the Blackett because of their threatening attitude.

Indications are that by fall, Vancouver will be twice as large and more substantially built than before the J.J. fire. The day after the fire lumber was being delivered on the ground for new buildings and several were occupied before sundown.

1896: 50 Years Ago

Bishop Reeve of Mackenzie River arrived in town. Rev. Mr. Holmes and Mrs. Holmes are in town from Slave Lake.

Jenner's mining scow has been brought down the river.

J. Walsh, veteran fur buyer, has decided to retire and will settle on his farm at Alameda, Assa.

1906: 40 Years Ago

The census commission announces population figures of Alberta cities and towns as follows:

	1906	1901
Calgary	11,937	4,091
Edmonton	11,534	2,626
St. Albert	2,377	1,588
Lethbridge	2,325	1,572
Wetaskiwin	1,654	550
Red Deer	1,420	323
Medicine Hat	144	796
High River	1,018	153
LaMoore	1,015	499
Cardston	1,002	639
Staffordville	623	
Fort Saskatchewan	585	306
Ponoka	473	151

1916: 30 Years Ago

Toronto: Forest fires have helped out six towns in Northern Ontario. Death list is now at 147.

Peace River Oil in considerable quantities has been struck in the J. D. McArthur well, 11 miles north of here. The well is on the Tar Sand Island.

New York: Property losses placed at \$25,000,000 resulted from the great fire at the Canadian pavilion at the Allies. The loss of life is not believed to be large, but 60 or more were injured.

1926: 20 Years Ago

Two thousand head of buffalo in the Wainwright park will be sold on the hoof by tender. The animals will be killed and hides and meat marketed.

Premier Aberhart's speech in Calgary, that now the registration of Alberta citizens is to be very long until the first Social Credit basic dividend is paid.

W. D. King, Calgary, was appointed deputy minister of trade and industry for the Alberta government.

Two sets of "scrap" certificates to cover one's promises to turn into a lucrative sideline, according to W. A. Fallow, minister of public works. Ray Miller and Jack Suter, Edmonton boys, docked their canoe at White Mud Creek after a 10-day trip downstream from Rocky Mountain House.

Emile Short, 65, has many years for trade at Fort McMurray died.

Today's Text

Blessed is he that considereth the poor: the Lord will deliver him in time of trouble.—Psalms 41:1.

The Passport Episode

By J. H. GRAY

Edmonton Bulletin Ottawa Bureau

OTTAWA: The new angle in the final report of the Kellock-Greenberg commission was the fact that the passport application was handled by Communists.

The evidence showed the passport holder had \$3,000 to get a passport renewed for an agent living in the United States. The agent was a Canadian who volunteered to fight in Spain in 1937.

The important point here is this: The Russian government in 1945 was still making full use of the false passport procedure put into operation more than two decades ago.

Because the Russians had no legal method of sending out representatives, it adopted illegal methods; i.e. the forging of passports of other nations and the use of stolen passports.

But when Russia was accepted into the community of nations, a Canadian agent travelling on a Canadian passport, could get to Los Angeles and attend a university for five years or more without

raising the slightest suspicion. That was what the agent traveling on the Canadian passport did.

The question now is: If one has a passport, what?

The number probably runs into hundreds. With a Communists party of 20,000 members in Canada a great many of members could get a passport to Moscow and after doctoring used to send Russians abroad to the Comintern. American or Canadian citizenship?

It is known that the Russians were using forged passports in 1945. We know the practice was still in use in 1943 and 1944 when passports were harvested by thousands in Spain. We know the evidence before the commission that the system was still operating in 1945.

On this point, and on the whole question of Communist morality, there is striking evidence in the commission report. When Sam Carr and Sam Rose were released from internment in 1944, both signed declarations under oath that they would have nothing to do with the Communist party or its agents would support the Russian agent travelling on a Canadian passport, could get to Los Angeles and attend a university for five years or more without

settling the strike was reached without delay.

Now that there are rumblings of more serious strikes it is possible that the industrial and fair treatment of workers may permit the settlement of pending disputes without the necessity of strikes or lockouts. Both labour and management feel they have some of a truce.

It is in the interests of both management and labour that these be settled peacefully, without interference with production, and for the public welfare.

Now that there are rumblings of more serious strikes it is possible that the industrial and fair treatment of workers may permit the settlement of pending disputes without the necessity of strikes or lockouts. Both labour and management feel they have some of a truce.

It is in the interests of both management and labour that these be settled peacefully, without interference with production, and for the public welfare.

On the other hand, there is no reason to believe that labour will be unable to recognize the wisdom of just and reasonable action. I am sure that the public will be more than willing to accept the decision reached by the government.

A district court judge may well be compared with a city high school teacher, who is asked to rule on a case.

The judges are getting vastly greater salaries than the school teachers and in addition receive a pension. The public is entitled to the pension paid to the teacher who must retire on reaching the age of 65 whereas the judge may continue on the bench as long as he likes.

Now why this huge disparity in salaries? Their educational standards are very similar. Anyone who has sufficient education to qualify as a judge should be able to study law, instead of education, quality, for the position of a judge. It is important in both cases that they be persons of the highest integrity, and of unblemished character.

Both teachers and judges are expected to be well dressed and should be as free as possible (and who is not?) from the influence of money.

I can see no reason why the personal expenses of a judge in maintaining his proper standard of living should be any greater than those of the school teacher.

In view of the above facts it would seem that judges are being very well paid at the moment for their duties or the teachers are doing a much better job.

We can only wait and see what the judges are doing. N. P. FINNEMORE 5501 91 street.

Don't Need Niemoeller

Kingston Whig-Standard

It has been noted that Rev. Martin Niemoeller intends to visit Canada later this summer and his ardent supporters are awaiting the admission of Niemoeller to this country. He can serve no good purpose here.

Lie Declares U.N. Success Hinges On Big Five Agreeing

**Woman Is Advised
Keep Royal Swans**

LONDON, (CP) — King George VI, the Prince of Wales, his assistant secretary for parades, Mrs. Edith Saunders of London "there is no pleasure in forbidding the keeping of swans."

Declaring that he did not feel that the world agency so far had fulfilled the broad hopes placed in it, Mr. Lie said the power of veto was not the only power imposed upon them an obligation to seek agreement among themselves.

"The United Nations was not designed to perform the functions of a peace conference, but it is equipped to act as a referee between the great powers," he said in a speech before the general assembly. "It was founded on the basic assumption that there could be agreement between the permanent members of the security council upon major issues."

"Many of the issues which come before the security council have arisen from inability to reach such agreement."

Mr. Lie is on a trip to Europe and the report was released by his office here. It included a comprehensive description of the work of the organs of the U.N. the world agency set up ahead.

Sometimes Impeded

He described the U.N. as a machine that can work only if all members can co-operate and said it was no stronger than the collective will of the nations that support it.

"The work of the United Nations would mean the failure of peace, the triumph of destruction."

Mr. Lie said the work of the U.N. would be of great benefit to all members, and especially the United States, Russia, Great Britain, China and France, "to ponder this, I have to say I have called attention and to exert every effort to overcome them."

NEW SCIENTIFIC DISCOVERY!
• This 2,4-D liquid concentrate permanently kills broadleaf, pine-tan, burdock, lamb's-quarters, the weeds that are most harmful to grass. Non-injurious to humans, animals, skin, clothes, 4-oz. bottle treats 1800 square feet.

PAGE FIVE

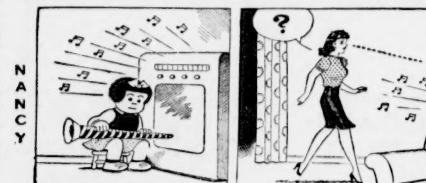

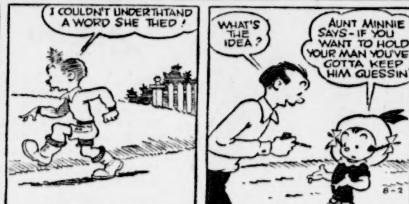

Buyers On Strike as Prices Rise

Throughout the U.S., with O.P.A. controls off, prices are soaring and buyers, faced with increased cost of living, are picketing stores and shops in an effort to keep their pocket books from being depleted. Shown here are women strikers parading before a butcher shop where meat is selling at \$1 a pound.

USED FOR 75 YEARS THE WORLD OVER

American Girls Touring in North

Two young American women who believe in linking their holiday travels with a first-hand study of mineral deposits and rock formations are present in Alaska territory, after having driven otherwise unaccompanied by motor over the Alaska Highway from their homes near Philadelphia.

THEY ARE MISS Elizabeth W. Olmsted, a geologist at Smith College, Northampton, Mass., and Miss Margaret Peterson of the same educational institution.

They have been in the far north for the past three weeks and their return by motor to their homes across the border is expected to be within the next few days.

Friends of R. A. Andison, clerk of the provincial executive council and Mrs. Andison, the two young resourceful American university women, will stay over in Edmonton for a few days' visit before proceeding on their long journey home, Mr. Andison said Thursday.

Lucky Break Brings Business

WINNIPEG, Aug 2 (CP) - It might almost be said that Winnipeg's only school of photography was the indirect result of a fight between a police constable and an unidentified law-breaker about 10 years ago. As the constable beat his victim with a smashing right, a youngster named Harry Prissel aimed his miniature camera and took a fine series of action pictures.

HE SOLD THE PICTURES to a newspaper, resold them to a magazine, and sold them again to the house organ of a camera manufacturer. Harry never assimilated his trade and decided he'd found his career.

After a spell of duty as a photography instructor in the RCAF, Prissel opened his own camera school in Winnipeg and now pursues his daytime job and attends classes to learn a new hobby: others want to open studios or work for newswires.

CERTAIN BUTCHER is the most ambitious of all. He wants to buy a trailer and go on camera tours of Manitoba and Saskatchewan, selling his pictures to magazines.

What these optimists forget is that Nature and Mother formed them long before they ever came along. Nature's gift to us is the bodies and their disposition that they may be polished up a little, but that can never be altered materially. Then Mother took care of them, setting them in bone and habits in solid concrete.

The moral of all of which is, boys and girls, pick out the kind of husband you want, for you can't make 'em over to suit your fancy.

Noted Author Writes Indian War History

NEW DELHI, Aug. 2 (CP) — Compton Mackenzie, the distinguished novelist, whose "Gallipoli Memories" and other historical achievements had a great success after the First Great War, has been engaged to write a popular history of India's military effort and achievements in the Second World War. Mackenzie will arrive in India in October to begin his task. The full history, which the historical section, set up a year ago by the Indian defence ministry, requires of India will necessarily take some years to complete, but it is felt that an abridged history by a popular writer is required to be produced immediately. There are similar accounts which are being prepared by all the Allied Nations.

This mania that otherwise same men and women have for marrying one sort of a mate when they want another entirely different is most curious because it is so inexplicable. A man does not invest his money in a sailing-linen limousine if he needs a garage, does he? But when he wants a bengaline ball dress if she is going to stand behind a counter all day. But when he comes to marrying, they will throw prudence to the wind and kiss common sense good-bye and take their families instead of backing the old man.

THE GIRL who marries a drunkard never doubts that her sacred influence will keep him from

ever thirsting for a highball again. The one who marries a lazy loafer, on the other hand, can never make him sit down and work, never to be a burden to her.

It is the same with a husband.

Many of them were college graduates.

Most of them had the knowl-

edge of life that comes from hav-

ing eaten their fill of beans and rubbin' elbow with reality.

This mania that otherwise same

men and women have for mar-

rying one sort of a mate when

they want another entirely dif-

ferent is most curious because

it is so inexplicable. A man does

not invest his money in a sail-

ing-linen limousine if he needs

a garage, does he? But when he

Many Attractions For Civic Holiday

Edmontonians young and old Friday were hoping for a spot of the best of Northern Alberta weather for the forthcoming holiday weekend. Monday has been set aside by city council as a civic holiday and toll-free citizens were preparing to enjoy a variety of sports activities, a couple of days at the lake, or time to finish up a few odd jobs around the garden.

FOLLOWERS OF THE annual and honorable pastime of lawn-bowling will have a gala weekend.

The annual Alberta lawn-bowling games will underway here Monday morning, with the opening of the tourney commencing Sunday morning. Other events lined up for others of the great outdoors include baseball and the usual full quota of fastball, tennis and junior baseball.

Two baseball games are scheduled for Saturday, Calgary (Purity) Playing Cubs at 2:30 p.m. and the Edmonton (Saskatchewan) Indians at 4 p.m. The usual Sunday afternoon session, while on Monday Delisle will be here for two games, the first getting underway at 2:30 p.m.

A GOOD PERCENTAGE of Edmontonians will be likely to participate in their gardens. One hardware dealer, whose shelves are generally the delight of amateur gardeners, reported Friday that a fair, large shipment of rubber hose received early in the week, had been "sold out to the last inch" after only a couple of days. Other firms reported their turnover in garden seed was still high, with new home-owners anxious not to leave tattered before the end of the summer season.

Other resorts in the district were expected to have a volume of weekend visitors larger than the advantage of Northern Alberta outdoor attractions. And just in case it rains, local theatres have booked

Cardinal McGuigan To Visit Edmonton

Cardinal James McGuigan of Toronto is making a tour of the west and is scheduled to be in Calgary from Aug. 6 to 8, after which he will create a special visit to the Edmonton archdiocese.

DESPITE SHORTAGES of building materials which has caused a slackening up of the issuing of permits, the number of permits were taken out during July for the erection of homes. Their permit value was \$476,800.

The cumulative total of home building permits issued up to July 31, 1946 is \$3,053,625, and the number of permits issued, 1,238. Last year during the seven-month period there were 882 permits issued with a value of \$1,626,628, an increase this year of 380 permits and \$2,124,907 in permit value.

THE TOTAL of building permits issued during the first seven months of this year is 1,238, and the cumulative total \$3,053,625. For the same period last year there were 882 permits issued with a permit value of \$1,626,628. This is more than \$1,000,000 in excess of the total of such permits issued during the same period of 1945.

Friday a permit was issued to the Masson Harris Co. for \$268,768.

Mr. H. L. Harris, K.C. in city police court Friday morning

Henry Poffenroth and Alex Schurko, jointly charged with vagrancy, were given a five-day jail sentence and from the time of their arrest which was July 28. Police received a promise from both that they would leave town immediately.

Before The Magistrate

Claude W. Loper appearing on a charge of rape was remanded until Aug. 9 and had bail set at \$2,000, when he will be remanded before Magistrate H. L. Harris, K.C. in city police court Friday morning.

Other visitors in the district were expected to have a volume of weekend visitors larger than the advantage of Northern Alberta outdoor attractions. And just in case it rains, local theatres have booked

Building in City

Hits New Peak

Edmonton's commercial building program this year is the greatest in recent history, with 166 permits being issued with a permit value of \$7,714,774 for the first seven months compared with 47 permits with a permit value of \$223,800 for the seven months ended July 31, 1945, according to a report filed Friday with the city commissioners. Maxwell Dewar, city architect.

DESPITE SHORTAGES of building materials which has caused a slackening up of the issuing of permits, the number of permits were taken out during July for the erection of homes. Their permit value was \$476,800.

The cumulative total of home building permits issued up to July 31, 1946 is \$3,053,625, and the number of permits issued, 1,238. Last year during the seven-month period there were 882 permits issued with a permit value of \$1,626,628. This is more than \$1,000,000 in excess of the total of such permits issued during the same period of 1945.

Friday a permit was issued to the Masson Harris Co. for \$268,768.

Mr. H. L. Harris, K.C. in city police court Friday morning

Henry Poffenroth and Alex Schurko, jointly charged with vagrancy, were given a five-day jail sentence and from the time of their arrest which was July 28. Police received a promise from both that they would leave town immediately.

Housing Parley Said Satisfactory

A satisfactory response from Mayor Harry Ainsay to presentation by officials of Edmonton branch No. 24, Canadian Legion, B.E.S.L., of problems facing the city's ex-service personnel in procuring suitable housing needs, was reported Friday by W. J. Williams, M.L.A. legion secretary - manager.

Mr. Williams, with George Gleue, a legion executive member, met Mayor Ainsay Thursday afternoon, and discussed various problems involving construction by veterans in their own homes. Among these problems were shortages of various building materials, particularly cement, and the allocation of available materials.

Williams said that Mayor and City Council are doing all they can. "Mr. Williams said, "There was still in his opinion, considerable difficulty in getting houses built on the city. Among these were building alleys, dance halls and new churches."

IT'S UNFAIR TO let these houses stand idle in the face of such housing needs as the 497 applicants for accommodation who have been received in the last few days."

The housing shortage in Edmonton has reached such proportions now that even persons with children are failing to find accommodation, Mr. Williams concluded.

City Council, at its more regular meeting, held Monday evening, will be asked to decide on a scheme of priorities for construction work being carried on in the city, Mayor Ainsay Thursday.

The Legion's housing committee was called by the executive of the Canadian Legion in an interview with Mayor Ainsay Thursday.

A committee delegation agreed that the erection of commercial buildings should not be interfered

Mr. and Mrs. Harold G. Spalding

Well-Known Edmontonians Celebrate Golden Wedding

BY DOROTHY HOWEY

Winnipeg, and four grandchildren. After 20 years' service as operator in the Teleglobe Building, Mr. Spalding has retired, an except for an occasional return to the office during the holiday season, as he did last month at the Agency Building, finds his home, neighbors and community and his flower and garden, a source of great pleasure.

Both Mr. and Mrs. Spalding were born at Standsted, Essex, near London, where Mr. Spalding was employed in the saddlers' and harness makers' trade.

Mr. SPALDING brought his family to Canada in 1910, settling first in Winnipeg, then in the Cameron district and finally Edmonton. The couple are the parents of four sons, all in the First Great War for Mr. Spalding and subsequent visits to the Old Country, the family has been in Edmonton since 1918.

Having joined up the year war was declared, and having spent his first year in uniform at Sarcee Camp, near Calgary, he went overseas in 1916 with the 43rd Battalion Overseas, transferred to the Veterinary Corps, he practiced his trade for three years at Folkestone, England, the best place in the world. He admires his trade, "saddlery"—wouldn't have helped much the recent war, having yielded place to mechanized methods.

AFTER COMING BACK to Edmonton at the end of the war, he made another visit to England and after his return, "regularly settled here."

Before the war, Mr. Spalding and a friend decided to establish their family on a homestead in what is now the neighbourhood, and there was a considerable amount of land available.

Mr. Spalding, who had been preparing to go to England, was remanded to the Fort, where he was held for 10 days, then released on bail of \$1,000. He was then sent to the 4th Battalion, Royal Canadian Regiment, and was held for 10 days, then released on bail of \$1,000.

He is survived by his wife and five children, Simone, Robert, George, Ronald and June, all at home, and one sister, Miss Laura Kenealy, residing in London, England.

He is survived by his wife and five children, Simone, Robert, George, Ronald and June, all at home, and one sister, Miss Laura Kenealy, residing in London, England.

Kenneth Myers and Ralph Ross, both appeared in Calgary, appeared before the magistrate yesterday morning and were remanded until Aug. 9. Detective Sergeant Peterson stated Friday David McGrath and Muriel Birch, Miss Kennedy were picked up in Sarnia by city police there and are being held in connection with the case.

Thousands of years ago, the Egyptians knew the art of manipulating yarn with needles.

Grade 9 Results Placed in Mail

Thousands of Grade 9 students throughout the province have finally learned the verdict of the judges of their toll who have spent the last three weeks marking their examination papers.

Grade 9 residents of Edmonton received their results Friday morning, and those in other sections of the province will receive theirs Saturday afternoon, depending on the mail to certain rural districts.

The volume of examination papers sent this year was not as favorable as those of last year, it was understood from officials of the department of education, and there was no noticeable decline in the number of those who

Power Needs of City are Higher

Power plant production for civic requirements for the period Jan. 1 to July 28, 1946 totalled 67,958,600 kilowatt hours, compared with 44,700,000 for the same period last year, an increase of 21,258,600 kilowatt hours, according to a statement filed Friday with the city commissioners by W. L. McNeilly, power supervisor.

Mr. CESSFORD, president of the Edmonton branch of the union said that the vote to take a strike was unanimously endorsed at one of the largest meetings ever to be held by the local union, Thursday evening.

That meeting taking place as union members passed through the gates Friday. It is expected that results of the vote will be known Friday evening.

Preliminary negotiations are now being conducted at Toronto and Calgary on a national basis with Burns and Canada Packers.

Meat Packers Vote on Strike

United Packing House workers at the local Swift Canadian plant are taking a strike today in the negotiations between employees and the company to be conducted on a national basis.

W. L. McNeilly, power supervisor.

Grade 9 residents of Edmonton received their results Friday morning, and those in other sections of the province will receive theirs Saturday afternoon, depending on the mail to certain rural districts.

The volume of examination papers sent this year was not as favorable as those of last year, it was understood from officials of the department of education, and there was no noticeable decline in the number of those who

Civic Block Closed Saturday, Monday

The Civic Block will be closed on Saturday and Monday, the latter being the annual civic holiday.

THE SATURDAY closing of the Civic Block will inaugurate the five-day week for civic employees working in the block. At a recent meeting of the city commissioners a decision was made to introduce the five-day week for employees in the Civic Block starting with the first Saturday in August.

The five-day week also began with the members of City Federal Union No. 30 and became effective on Aug. 1. It is expected that the principle of the five-day week will be adopted for all city employees, including the police, fire department, and the city commissioners.

KENNETH Myers and Ralph Ross, both appeared in Calgary, appeared before the magistrate yesterday morning and were remanded until Aug. 9. Detective Sergeant Peterson stated Friday David McGrath and Muriel Birch, Miss Kennedy were picked up in Sarnia by city police there and are being held in connection with the case.

Rotarians Hear of Chinese Heroism

Heroism and sacrifice on the part of the Chinese diverted an earlier Japanese attack on Pearl Harbor. F. L. J. C. Matheson, RCAF, told members of the Rotary Club, at a regular club luncheon meeting in the Macdonald hotel Thursday.

SUBJECT OF the address, was China, and he was referring to the heroic manner in which the Chinese fended off the northern coastal area of their country, foiling the sweeping attack planned by the Japanese. The heavy struggle that ensued for three months in that area as 20 divisions of the Chinese Army held off an overpowering number of Japanese.

Before the war, F. L. Matheson spent several years in China as a missionary with the United Christian Missions, where he served with British intelligence units in that country. He has been stationed in Edmonton at Northwest Command, for the last few months.

UTILIZING a blackboard sketch of the country, he painted a vivid picture to the Rotarians of the long years of war. He explained the geography of the country, the economical aspects and the diversities of language in various areas and told of the progress and respect for the abilities of the generalissimo and of the amazing heroism of the Chinese people.

He also spoke of the Rotary Club of Chongming of which he was a member, and told how the club had four times been bombed out, and how the final rotary establishment was used by displaced members and as a meeting place for Army and political bodies.

The speaker was introduced by Bill Hulbert, Raymon, divisional commander of the Salvation Army.

PRairie Grains

Mature Rapidly

During the hot spell which has been general throughout the prairie provinces for the last week, grain matures rapidly and in some areas rain would be beneficial to aid in the filling out of late planted crops, according to the weekly crop report issued Friday by the agricultural departments of the Canadian Pacific and Canadian National Railways.

IN THE EDMONTON area, extremely hot weather with only scattered showers were reported during the last week. The point suffered from lack of moisture as far as is the extreme east along the Saskatchewan border. Heavy growth of wheat and coarse grains is still possible, but the sub-soil moisture is sufficient to carry them to maturity. The outlook is still to an average to very heavy yield of all grains.

In southern Alberta, rains have fallen from Bow to Peace River Block and moisture there now appears quite adequate.

DETERIORATION of crop prospects is reported in the areas of the Peace and the Athabasca. Some rice has been eaten in areas of Fairview. Cutting north of the Peace River should get underway in about 10 to 15 days. Haying is general with a good crop prospect.

Clear warm weather in southern Alberta brought the crops along rapidly. A good general rain is needed to prevent any further deterioration. Harvesting of wheat and barley is reported with one report of spring wheat being combined. Prospects of an average crop still fairly poor.

To Attend Parley

Mrs. Edith Rogers leaves Sunday for Regina to attend the CCF national convention. She will be the official delegate for Edmonton west.

Why Grow Old?

If you want a lift, try a different hair-do. Perhaps one like Ida Lupino sports above would do the trick.

By JOSEPHINE LOWMAN LOVELY ANNA LEE, one of America's most popular young actresses believes that you can give yourself a lift — and one, with a combination coronet braid and pompadour. Her hair is swirled up off the nape of her neck, the pinned from side to side at the top of her head. The locks at the side of her forehead are combed over the braid, and the ends powdered, it forming two side puffs.

MISS LEE says: "Like the first ray of sunshine after a rainy spell a new coiffure will boost your spirits when you are feeling low. You can have a formal look with the hairdresser in order to have a variety of attractive and becoming hairdos. You can learn, with Miss Lee's help, how to change your basic hair style definitely and entirely. Sometimes when you have an idle hour to while away, sit down at your dressing table and experiment to see what you can achieve in your coiffure."

IF YOUR HAIR is short, as so many heads of hair are today, Miss Anna Lee suggests that you wear it in a bun at the back of your head when you wish to achieve a more formal, or a different appearance. I do think that too few women indulge in this kind of fun, and I am sure that many of you will like to try it.

THE ACCIDENT took place while Mr. Lee was attempting to blow a tree stump out of the ground. He was watching. Both were blown off a cliff into the air and to a hospital in Grande Prairie. Mr. Lee died in the same explosion, died Tuesday.

Second victim in the dynamite explosion which occurred on a farm near Boyle on Monday, Peter Huay, died in a hospital Thursday afternoon. His son, a boy of 16, was injured in the same explosion, died Tuesday.

THE ACCIDENT took place while Mr. Lee was attempting to blow a tree stump out of the ground. He was watching. Both were blown off a cliff into the air and to a hospital in Grande Prairie. Mr. Lee died in the same explosion, died Tuesday.

Both the bodies will be forwarded to Boyle on Monday for a double funeral service to be held at 2 p.m. Tuesday.

SURVIVING Mr. Hulbert are his wife, Edith, at home, his parents, Mr. and Mrs. Joseph Hulbert, two brothers, Fred and Joseph Boyle, and three sisters, Mrs. Steve Yaremchuk and Miss Oliverine Hulbert, and Miss Mildred Hulbert of Boyle.

Pack Memorial is in charge of funeral arrangements.

The four-horned antelope is the only living wild four-horned animal.

Anna Lee combis her hair into a low chignon at the back of her neck.

3. For country wear. If like Anna Lee, why not wear the new up-to-date look of the old and new pompadour. She combs the hair above her forehead into a roll point, and the hair at the back of her head is swept off her neck.

4. For informal daytime wear. Comb your hair off your forehead and off your ears. Anchor at the top with one long hair, two short side barrettes in back of your ears. Then for that neat-as-a-pin look, make a sleek roll from ear to ear, and tie it with a paper clip.

2. FOR IMPORTANT afternoons. Anna Lee combs her hair into a low chignon at the back of her neck.

Chinchilla Fur Farms Spring Up in Canada

By KAY REX

Canadian Press Staff Writer
Soft, luxurious chinchillas—fur that is rarer than diamonds, more precious than gold—will one day come into its own in Canada where the two-year-old chinchilla breeding industry is attracting fur farmers.

THE ROMANCE of the delicate, plush-furred chinchilla, a small, slender wild boar of the Andes as its homeland, reads like an epic from the land of moviedom. On the entire North American continent, there are only approximately 25 genuine chinchilla coats worth up to \$50,000 each.

Since 1923 when the first six dozen chinchillas were brought to the United States in an attempt to breed in captivity, the animals which were fast becoming extinct in their own land, chinchilla ranches have sprung up in all parts of the continent. Now there are more than 20,000 of the animals.

IN CANADA the Canadian Chinchilla Company, with head office in Toronto, has opened a breeding farm and will have ranches throughout southwest Ontario and the Niagara Peninsula, sells pairs of chinchillas to would-be fur farmers throughout the Dominion.

The United States and now Canada are the only countries in the world with chinchilla industry, said Mrs. Hilda McAfee, president of the Canadian Chinchilla Company. She predicted there would be no market to speak of in the fur for at least five years because the demand for breeding is so great.

Mrs. Brown, who was in the fur breeding industry herself for 14 years, said women in several parts of Canada are raising chinchillas. She predicted that within a year or two they would eventually go into it.

"A woman is gentle when handling animals, she grows to love them and when she takes on a job she carries it through and she does it well," said Mrs. McAfee.

IT COSTS \$1,650 for a pair of chinchillas, but as they breed at least twice a year the farmer should be more than repaid within two years.

The animals are clean, with no

Edmonton Woman Writes of Goldfish

Mrs. Hilda McAfee, who has written 15 articles for the magazine, "Canadian Horticulture and Home," has just had published in the magazine an article entitled "Fish, Alive or Dead," which is the story of goldfish.

Mrs. McAfee has a prize-winning garden at 11330 92 street and this year she has added a fish pond, 50 gallons in it. She also has a wonderful outdoor display of begonias. She won two prizes at the recent rose show.

Mrs. McAfee says, "Water in the garden is a necessity and a handsome background, and no matter how small one's garden may be, a little fishpool can be tucked in somewhere, for it never looks lonely. It adds to the atmosphere of contentment, it spreads an air of happy self-sufficiency throughout its environment".

She describes the feeding and care of goldfish in the article, which should prove interesting to anyone thinking of having a fishpool in the garden.

Truck Stolen

A truck driven by Sgt. Bennett of the Canadian Army, Edmonton Corps, has been reported stolen from railhead, 342 street and 105 avenue. The sergeant told police that the two and a half ton stake truck was taken by two French Canadian soldiers at about midnight Aug. 1.

order, and are vegetarians. They are not hard to look after but Mrs. Brown said new farmers should spend several days around the company ranches, learning how to care for their animals, before taking them out.

Two years ago there weren't more than two persons in Canada raising chinchillas but today there are more than 500, most of them in Quebec and Ontario.

Since 1923 when the first six dozen chinchillas were brought to the United States in an attempt to breed in captivity, the animals which were fast becoming extinct in their own land, chinchilla ranches have sprung up in all parts of the continent. Now there are more than 20,000 of the animals.

THERE IS NO BLUE GRASS IN KENTUCKY

Although Kentucky is called the "Bluegrass State," the grass there is a very bright green of the species called "June grass" in other States.

Duties of ancient Greek midwives included exposing the child on a hillside or temple steps if the family decided not to keep it.

Pensions Meeting

The 60 at 60 Pension Association will meet at the north side public library tonight at eight o'clock. A provincial constitution will be discussed. Mrs. Edith Rogers, president, will be chairman.

The only thing blue about the grass is its blossoms, which ripen in June and are a bright blue. This grass is not better for horses than other grasses, in spite of the fact that race horse owners believe it produces champions.

Duties of ancient Greek midwives included exposing the child on a hillside or temple steps if the family decided not to keep it.

**It's to your Advantage
to Buy Furs in August**

It has always been good thinking to buy furs in August. This year, it is even wiser. For while some furs are more available than they have been, still certain furs are not yet plentiful. Thus the cream of the catch will go to early shoppers. Our purchases were made very early . . . which gave us a price advantage. Another advantage in buying now is that you have the time to select leisurely and make comparisons. The listings below will give you an idea of the advantageous values to be found in our trustworthy collection.

Hollywood Wolves Lack Finesse Declares Actress

By HOWARD C. HEYN
HOLLYWOOD Aug. 2—
If you girls have any idea that Hollywood men are more romantic than the boy in Podunk, Ruth Warrick wants to straighten you out.

"HOLLYWOOD WOLVES" bore me she told me on the "swell guy" set. Thus however, does not mean that Miss Warrick opposes romance.

"Romance is wonderful, and I'm all for it," she declared. "It's the Hollywood approach that I don't like. These men lack finesse."

In a town where there are presumably so many articulate women, who can imagine that men you'd expect their lovemaking to be original. But that's not the case. Ruth reports.

"IT'S SIMPLY a battle of the sexes," she added.

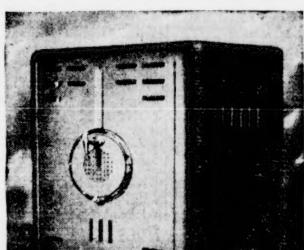

"Men who have anything to do with actresses are crazy," she added. "We're too self-centred."

Miss Warrick, for the record, recently divorced Erik Rolf, a radio actor. *

Reverts to Peace

NEW DELHI, Aug. 2—The pro-Indian movement in the Indian Army is proceeding according to plan and by October, 1946—de-mobilization started in October last—1,000,000 Indian soldiers in the world will have been reduced to 650,000 men. Already,

more than 650,000 men of the Indian Army have been returned to civilian life.

Winter Warmth

with the

"Roy Thermo"

Space Heater

— **economical**

— **efficient**

— **convenient**

This modern oil burning marvel gives you the convenience of gas

It burns wintergrade diesel oil or fuel oil, using the vaporizing principle, which means complete combustion without soot, fumes or other annoyance.

You will find this heater a very great improvement in your home.
